

# Fighting Equipment Theft

In the highly competitive construction business, the last thing you need is to have your equipment stolen. Theft is a prevalent problem in the industry, with millions of dollars worth of equipment stolen every year. That's why International Marine Underwriters (IMU) has joined forces with the National Equipment Register (NER) to offer extra layers of protection against this threat.

By working with NER, IMU customers can hinder thieves and greatly increase the chance that stolen equipment is recovered. Just register your equipment with NER's HELPtech database, a secure and confidential database that enables law enforcement to identify the true owner of any registered machine 24-hours a day, seven days a week, anywhere in the country—even before a theft is discovered and reported.

## How it works

NER's secure and confidential databases contains more than 22 million ownership records and 100,000+ theft reports, records, and detailed information about equipment ownership. Additionally, it collects multiple points of identification for a single machine. In the case of theft, NER can use its database to apply a unique search algorithm to find possible equipment matches and enables law enforcement to identify the true owner of any registered machine.

Additionally, IMU also offers a theft deductible waiver endorsement to its insureds registered with NER. In the event that a registered piece of equipment is unable to be recovered, and the theft was reported to local law enforcement, the endorsement waives the theft deductible, up to \$10,000.

## Registration & Cost

For a nominal per-machine annual fee, owners can register their entire fleet of equipment with NER. And as an IMU policyholder, you will receive preferred pricing.

There are several registration options:

- **Lifetime Registration:** The equipment remains registered until it is sold. Your registration fee includes three warning decals. As an IMU policyholder, you will receive preferred pricing of \$32 per unit.
- **Annual Fee:** Owners with larger fleets may find the annual fee option more cost effective. This option allows registered owners to benefit from a secure online fleet management system, where equipment may be added and deleted as it is acquired or sold. The fee scale applies to the number of items registered and not how many are added or removed in any given year.
- **5 and 10 year Fee:** If you would like a cost effective, long-term option, consider registering for 5 or 10 years. *This option is only for OneBeacon policyholders.*
