

EQUIPMENT THEFT

DETER. DETECT. RECOVER.

IN ALLIANCE WITH THE NATIONAL EQUIPMENT REGISTER

Protect your farm equipment by registering with the National Equipment Register (NER).

Agricultural equipment is more than something you own, it is the core of your livelihood. Theft of agricultural equipment can be a costly problem for equipment owners. By registering with NER, you can help safeguard your equipment and your way of life.

DETER. NER provides you with a highly visible decal on each registered piece of equipment. This decal helps act as a theft deterrent by alerting potential thieves that the piece of equipment can be identified and tracked by police.

DETECT. If registered equipment is missing, law enforcement officials can access NER's HELPTech® database to identify and track the lost or stolen property. HELPTech is a heavy equipment loss prevention national database. In some instances, registered equipment can be identified by law enforcement as stolen before an actual theft report has been filed.

RECOVER. In the event of a reported theft, Zenith's Agribusiness Solutions will work directly with NER to quickly locate and secure stolen equipment through law enforcement and equipment industry contacts.

Equipment Theft Facts from NER*

The type of equipment that thieves are most likely to steal is determined by two key factors: value and mobility.

THEFT AND RECOVERY BY STATE

California had the fourth highest equipment theft in the U.S. in 2011, while recovery ranked first.

THEFT BY LOCATION

Theft can hit close to home. In 2010, almost 30% of equipment theft occurred on a policyholder's premises.

COST OF EQUIPMENT THEFT

In 2011, there were 105,482 thefts reported in the NER database. Most estimates say the annual cost of equipment theft is in the range of \$400 million.
